Feedback and Ouestionnaire

- **Baseline, Midline and Endline feedback** we take baseline feedback using a questionnaire, from the participants to understand their physical and mental condition. After 4 months, we take midline feedback with different questions related to the baseline questions, to measure the progress in their physical and mental condition. Finally at the end of the program, we take final feedback.
- Baseline, midline and endline questionnaires (sample responses10 out of 30 are given) as answered by the beneficiaries and the results are recorded as shown below.
- The questions highlighted in dark (viz, 1,4, 5, 7-11, 13, 14, 17, 18) are on a scale of 1-4 with 1 being low and 4 being highest. The remaining questions in plain white are on a scale of 1-3. They are converted into percentage(%) by dividing by the denominator (3 or 4, as applicable).

12. Participant's Feedback Analysis

We, in WCSC-VSP, use a questionnaire (as mentioned above) covering questions related to the improvements and / or experience by everyone after practising and applying the SKY exercises, meditation and introspection techniques in their life. Based on the responses received, we consolidate and analyse the results. The inference drawn from the responses are as follows:
